

October 23, 2025: On the Nazi Coup de Tat that Finished America

From everything that I can gather from my position 'on the ground' -

We have all witnessed, and
are continuing to see the consequences of,

A Nazi coup de tat that was created and enabled by the American military itself using American police forces and politicians as the 'useful idiots' that pressed their power against the law abiding citizens of America and the world.

I do not believe that America is going to be able to survive this moment.

I am looking at numbers - facts - details that say that America is going broke and is completely dysfunctional.

Truly, I am requesting that responsible people
in positions of authority and power begin to construct a
Super-state of regional governments that are ready to hold together the peace of America once
the Federal government becomes unable to pay its debts.

We can clearly see - right now - the intended plan of a long-term government shut down.

The USA Military will continue to operate and be paid above and beyond all others -
While running rough-shod over the rights of the people that they were supposed to serve and
protect.

I firmly believe that this long-term government shut down, and
the actions that were taken while it was in effect,
Are proof enough for me that the USA military is in full control of the American government -
And also much of American industry, thanks to the destruction of Donald Trump.

I have been stating that we are living through a military coup de tat for years now.

I am holding fast to this opinion and I am offering a peaceful solution:
We, the People, need regional stability to structure itself in the time period between now and
the actual consequences of the decisions that were failed to be made on our behalf.

I am requesting this for the benefit of We, the People, and I hope that everyone in the world will
hear this message and act accordingly.
